August 6, 2003

Sir:

In connection with the captioned application, and in further response to the restriction requirement mailed June 3, 2003, Applicant submits the following items:

- 1) Revised Sequence Listing in CRF filed on CD-R pursuant to 37 C.F.R. § 1.824.
- 2) Written Sequence Listing filed on CD-R pursuant to 37 C.F.R. § 1.52(e)(1)(ii).
The disc is provided in duplicate (COPY 1, COPY 2). The two copies are identical, with each disc formatted for IBM-PC, MS-WindowsNT operating system compatibility, each disc identically containing a single file named pto_PB0176.txt, having 55 kilobytes, last modified on August 5, 2003, and recorded August 6, 2003.

Applicant states:

- 1) The sequence listings do not include any new matter.
- 2) The sequence listing information recorded in computer readable form is identical to the written (on compact disc) sequence listing.

Applicant has added new sequences numbered 54 through 68 to incorporate the sequences identified in Figures 1B, 1C, and 1D. Per the Examiner's instructions, Applicant has amended the Brief Description of the Drawings section in the specification to insert the corresponding sequence identification numbers. Due to the need to list the additional sequences, Applicant submits herewith a new CD-ROM containing the revised "Sequence Listing" and computer readable form "Sequence Listing" copies along with the required statements under 37 CFR § 1.821 (f) and (g).

As required, Applicant respectfully requests in the amendment response to the restriction requirement that the revised "Sequence Listing" submitted herewith replace the original "Sequence Listing" as filed.

Please direct any remaining issues to Applicant's counsel at the telephone number provided below.

Respectfully submitted,

Yonggang Ji
